

Open Letter by Members of the Academic and Research Community in Support of a Democratic Transition in Iran

We, the undersigned members of the academic and research community in the United States and across the Iranian diaspora, express our unwavering solidarity with the people of Iran in their pursuit of freedom, justice, and democracy.

During recent nationwide protests, millions of Iranians in the streets have chanted the name of Crown Prince Reza Pahlavi as their leader, making clear that his leadership is supported by a majority of the Iranian people and **arises from within Iran itself**. At this critical historical juncture, we affirm our support for Crown Prince Reza Pahlavi and his call for a principled, peaceful, and democratic transition in Iran—one grounded in popular sovereignty, accountability, and free and fair elections.

We formally support and endorse the following six priorities, **outlined by Crown Prince Reza Pahlavi**, and call upon democratic governments, international institutions, and civil society to act on them without delay:

- i) Protect the people of Iran by weakening the regime's machinery of repression, especially by targeting the Islamic Revolutionary Guard Corps (IRGC), its commanders, its command structure, and its infrastructure.
- ii) Maximum economic pressure by blocking the regime's assets around the world and targeting its clandestine network of oil tankers, known as the "shadow fleet."
- iii) Provide internet for Iran through Starlink and other secure communications tools, and disable the regime's ability to shut down the internet.
- iv) Expel the regime's diplomats and pursue legal action against perpetrators of crimes against humanity.
- v) The immediate and unconditional release of all political prisoners.
- vi) Prepare for a democratic transition in Iran and recognize a legitimate transitional government.

As scholars, educators, and researchers, we recognize our ethical responsibility to defend human rights, academic freedom, and democratic principles. We therefore call upon fellow academics, research institutions, professional associations, and policymakers to publicly support these priorities and to act in accordance with them.

Our collective voice can and must contribute to paving the path toward a free, democratic, and peaceful Iran.

The following individuals have signed this letter in their personal capacity. Institutional affiliations are provided for identification purposes only.

Initiated by:

Amir Verdi, Associate Professor, Department of Environmental Sciences, University of California, Riverside, USA

Mohsen B. Mesgaran, Associate Professor, Department of Plant Sciences, University of California, Davis, USA
