
Scientific name: *Acacia redolens* ‘Low Boy’

Common name: Prostrate Acacia

Origin: Australia

Minimum Summer Irrigation: 20% ET_o (under full sun)

Cooling potential under deficit irrigation: High

Study area: Riverside, California (UCR Agricultural Experiment Station)

Plot establishment: 2019 | **Irrigation trial:** 2020-2021 (May-October):

Soil type: Hanford coarse sandy loam

Irrigation system: 12-inches tall Hunter PROS-12-PRS30 quarter-circle pop-up heads (Hunter Industries, Inc., San Marcos, CA) with Hunter PGV-101G solenoid valve (Hunter Industries, Inc., San Marcos, CA)

Irrigation scheduling: Automatic by a Weathermatic SmartLine SL4800 smart controller

Watering days: 3-4 days per week

Irrigation Efficiency (Low half distribution uniformity based on catch-cans test): 79%

Pruning height: --
